

# OPAS Release Notes

Release 24 / 5.0 Upgrade – to be installed January 26th, 2015

## OPAS Functionality

QP #	RFC #	Solution	What Changed	Any Known Issues
N/A	N/A	Upgrade to Quintiq 5.0	Upgraded OPAS to the latest version of the Quintiq core software. This includes updated user interface 'look and feel' and enhanced software response times.	
4290	N/A	Updating Data Maintenance time zones	<p>More time zone options have been added within the Data Maintenance application's Organization Unit dialog. The following time zone options now exist:</p> <p>Samoa Time Zone (UTC -11:00) --&gt; for American Samoa Hawaii-Aleutian Time Zone (UTC -10:00) --&gt; for Hawaii Alaska Time Zone (UTC -09:00) --&gt; for Alaska Pacific Time Zone (UTC -08:00) --&gt; (existing) Mountain Time Zone (UTC -07:00) --&gt; (existing) Central Time Zone (UTC -06:00) --&gt; (existing) Eastern Time Zone (UTC -05:00) --&gt; (existing) Atlantic Time Zone (UTC -04:00) --&gt; (existing) Chamorro Time Zone (UTC +10:00) --&gt; for Guam</p> <p>The old Newfoundland time zone has also been removed, as it is not applicable to the FAA.</p>	
2422	RFC # ISS00066151	Typing Shift Start time in Drop Down	Previously, when manually typing in a shift definition start time into the Move Shift dialog's dropdown did not result in the selection of the correct shift. This issue has been resolved in Quintiq 5.0, and typing "1430" into the Edit Shift time dialog will select the existing 1430 shift definition from the dropdown.	

# OPAS Release Notes

Release 24 / 5.0 Upgrade – to be installed January 26th, 2015

QP #	RFC #	Solution	What Changed	Any Known Issues
2146	RFC # ISS00054217	Application Parameters: Hitting "Apply" button after changing the Employee Requests sorting parameters (seniority/time of request) clears out the dropdowns	An issue was reported where pressing the "Apply" button within the Application Parameters when viewing the Requests tab would clear out the employee request sorting text boxes (i.e. Seniority or Time of Request). This issue is resolved in Quintiq 5.0.	
2278	RFC # ISS00059085	Undo: Change Error Message	<p>The error message when attempting to undo an action that cannot be undone displays text which was not user friendly. This issue has been resolved in Quintiq 5.0, and the new error message is a dialog which states "Undo: Undo failed, conflicts with other user's transactions."</p> <p>The dialog has the ability to expand to show its technical details, but these are not displayed by default.</p>	
3610	N/A	Internet connection interruption	<p>In Quintiq 4.5, an interruption in a user's internet connection forced users to close any open clients and log into OPAS again manually. This functionality has been resolved in Quintiq 5.0.</p> <p>When a client is open and the internet connection is lost / interrupted, OPAS will automatically attempt to re-establish the internet connection up to 5 times. Once the internet connection is back, the user will be able to pick up where they left off in the current client without having to manually log back in.</p>	
3821, 4409, 4410, 4411, 4412, 4413	N/A	Convert HTML Reports to Quintiq 5.0 BIRT report functionality	<p>Previously, HTML reports could not be opened if the user was logged into OPAS from an FAA machine. The reason was due to incompatibility with accessing the temporary file that is created as a part of opening these HTML reports.</p> <p>With Quintiq 5.0, these HTML reports were converted to BIRT reports (Business Intelligence and Reporting Tools). This tool has allowed reports</p>

QP #	RFC #	Solution	What Changed	Any Known Issues
			<p>that were previously accessed using HTML / temporary filepaths to be converted to a format that all users can now access.</p> <p>When one of these reports is opened, an orange toolbar will open at the bottom of the user's application. This toolbar will prompt the user to Open, Save, or Delete. Users who never had an issue with HTML / temporary filepaths may Open the report immediately; users who aren't able to utilize temporary filepaths may Save the report to a filepath of their own choice (e.g. Desktop) and opened.</p> <p>The following reports were converted to BIRTs:</p> <ul style="list-style-type: none"><li>(1) OT Assignment Report (accessed by right-clicking an assigned OT shift, navigate to Schedule Reports, select OT Assignment Report)</li><li>(2) Overtime Hours Report (accessed under Reports dropdown)</li><li>(3) Generate Day of Operation Report (button within the Day of Operation form)</li><li>(4) Print Bidding Results report (accessed by right-clicking a bid schedule in the Bid Schedule Setup form, selecting All crews or a specific crew, and hitting OK)</li><li>(5) Print Employee Hourly counts (accessed by right-clicking in the capacity chart of the Day of Operation form)</li><li>(6) Print Individual Bidding results (accessed by right-clicking an employee's name in the Bid Windows panel of the Bid Schedule Setup form)</li></ul>
